

FPG ENVIRONMENTAL POLICY

FPG is committed to conduct all of its business activities responsibly with the highest regard for environmental impact to its surrounding community, biodiversity and natural ecosystem. As part of this commitment FPG will strive continuously to put effort in ensuring compliance to all applicable legislative, regulatory and compliance obligations, employ procedures and systems designed to prevent activities or condition that can pose a threat to the environment, promoting sustainability effort and communicate our commitment to environmental protection to our employee, supplier and customer.

Supporting Policies:

To carry out this commitment it is FPG's policy to:

1. Continually assess environmental technology and program performance; including related Standard Operating Procedure, through routine health check and audit.
2. Rigorously use performance monitoring in Waste Water Treatment process to ensure compliance.
3. Adopt cradle-t-cradle approach for waste management, thus eliminating disposal of solid waste to landfill (Zero Waste to Landfill Policy).
4. Enable Ambition 2030's Goals in terms of Energy Efficiency, Renewable Energy, GHG Emission reduction, Water Efficiency and Water Circularity Targets to be achieved.
5. Ensure critical environment system is monitored and managed by Competent Person as defined by regulation.
6. Practice transparency of our environmental emission condition and performance monitoring result to be our employee, surrounding community, public member and legal authority.
7. Have operating programs, adequate funds and resources to implement environmental policy.
